

## Another Broken Egg Café at Evening Rose

Tallahassee, FL

Project Type: Commercial Hospitality

Product: CalStar Modular Face Brick

Color: Autumn Range

### CLIENT OBJECTIVES

**Carry through the sustainable building practices established in the LEED®-certified residences to the commercial buildings in the development.**

The Evening Rose Development is a planned community that recalls the towns and villages built prior to World War II. It combines a traditional mix of single and multi-family homes, live/work units and residential condominiums all built within walking distance of a town center. The homes make use of innovative building practices and materials and many qualify for LEED® certification. It was important to the developer to incorporate cutting edge techniques and materials to add lasting value while maintaining a traditional aesthetic.

**Provide a traditional variegated color palette and deliver performance comparable to clay brick.** When the developers of Evening Rose first learned about CalStar Brick they were interested in the environmental benefits but as with any new technology they needed assurances that the products would perform as expected. CalStar brick had to meet all of the ASTM testing required of clay brick and work practically for the masonry team to lay.

### THE CALSTAR SOLUTION

**CalStar's modular brick delivers unprecedented environmental advantages over traditional clay brick.**

The use of CalStar brick contributes to LEED credit by incorporating 40% recycled content and goes beyond LEED by saving 85% of the CO<sub>2</sub> emissions and 85% of the energy associated with the manufacture of traditional bricks.

**CalStar created the Autumn Range color palette specifically to meet the aesthetic and traditional style of the development with a complete package of third-party reports to satisfy the project stakeholders.**

CalStar won the overwhelming approval of the owner, developer, contractor and masons on the project. In fact, Jeff Rivenbark, president of Rivenbark Masonry and a fifth generation mason, commented that CalStar Brick was "in the top 10-15% of the products he had used."

### Environmental Metrics

13,125 modular bricks

#### CO<sub>2</sub> Emissions Prevented

Over 5 Tons

#### Energy Saved

65 million BTU

#### Landfill Diverted

(Recycled Content) 10 Tons

#### Mining Avoided

10 Tons
